

PunctureGuard™

The New Standard Interior Lining for Great Dane Everest Reefers.

Lighter and Stronger than any other interior lining.

Designed to protect a trailer's interior walls from everyday abuses, PunctureGuard linings and scuffbands are incredibly thin, yet extremely puncture resistant. Inherent by design, PunctureGuard is lighter weight and has nearly 3x the peel strength of other linings, making it extremely resistant to delamination. Its thermoplastic properties make it easy and quick to repair, reducing maintenance time and costs. And above all, it provides the most impact resistance available in trailer linings.

PunctureGuard provides the extra protection that will extend the life of your trailer, load after load, year after year.

Re-imagined. Re-engineered. *Remarkable.*
